Dear Dr. Baranick,

The patient was seen in the office today. She was assaulted on July 14, 2025, resulting in a severe neck injury. She is a dance performing artist which is preventing her from dance performances and practice.

On Physical Examination: Patient has tenderness on the left occiput area. Peripheral neurovascular exam is intact. The range of motion of the C-spine is decreased. There is no erythema or discharge around the joint. There is no muscle wasting. The examination of the rest of the MSK system was unremarkable.

I discussed the diagnosis, differential diagnosis and treatment options with the patient in detail today. I told her that she is suffering from left occipital neuralgia. The differential diagnosis would be arthritis and bursitis. At this point, given her severe symptoms, I am in favour of conservative measures. I recommended a cortisone injection. She understood the risks and benefits of the procedure including neurovascular injury, vasovagal reaction and pain for a few days and she decided to proceed.

Today in the office, under complete sterile conditions, I aspirated and injected the left occiput area with 80mg of Depo-Medrol and 2cc of 2% lidocaine, with no complications. I will see her back in four weeks.

Thank you for the referral.

Yours sincerely,

Dr. Mohammed Khodabandehloo,

Good morning Axel and Makenna,

The Department of Finance pulled my TS after initially sharing your feedback from this morning. I am forwarding our emails where they confirmed it last summer.

I would appreciate connecting with them & using it. If they pulled it, maybe NSIRA loses it.

It was alot of work & I really want to benefit from it.

Can you please connect with the Department of Finance Security from the email below?

I can't open the attachment on my phone. I will look at it when I get home.

Thank you,

Alexa.
